This tornado exited Calhoun County north-northwest of Thornton and entered Dallas County west-southwest of Beech Grove. Soon after entering the county, the tornado increased to EF2 intensity. The clubhouse at the Fordyce Country Club was badly damaged and the bathhouse was blown into the swimming pool. The tornado then knocked down two large, steel power transmission towers, causing the transmission lines to fall across Arkansas 273, where a motorist ran into them. Next, the tornado tracked through the northern side of Fordyce, where the damage was the most extensive. A damage survey by the American Red Cross indicated 11 single family dwellings (including 3 mobile homes) were destroyed, 6 had major damage, and 5 had minor damage. In addition to the structural damage, hundreds of trees and many power lines were blown down. The tornado exited Dallas County north of the Fordyce airport and entered Cleveland County west-northwest of Kingsland.

Flash flooding occurred in the area around Vendor. A swift-water rescue occurred on Handmaiden Rd. when a vehicle was swept off into a creek. The motorist and her 2 year-old child were rescued without incident. A farm tractor pulled the vehicle out of the creek.

Heavy rains caused flash flooding in Newton County on the 25th.
